BATHTUBS WASHBASINS FAUCETS FURNITURE 2022

# PREMIUM COLLECTION

Based on many years of our experience, observation of trends in bathroom arrangements, as well as our customers' choices, we have selected products that are most popular and are most often chosen to our customers' bathrooms.

The Premium Collection includes whole range of freestanding bathtubs, including new models that were just launched on the market, acrylic bathtubs with the slim edge finish, washbasins, a collection of premium bathroom furniture and several series of bathroom faucets. Such a selection of products for the Premium Collection allows the comprehensive arrangement of any bathroom.

**HIGH  
QUALITY**  
made in Besco

#### SANITARY ACRYLIC

Bathtubs and shower trays made of sanitary acrylic are characterized by a perfectly smooth surface, thanks to which it is very easy to keep them clean. Acrylic is a material with excellent heat-insulating features, which makes the surface of the product maintain the water temperature for a long period of time. The safety of use is guaranteed by the anti-slip and antibacterial features of this material. Thanks to the fact that the acrylic is coloured in the mass, all small scratches can be removed easily.

#### MINERAL DURABE

Products that are made in Mineral DuraBe technology are finished with extremely resistant Gelcoat coating. Thanks to this solution, bathtubs, washbasins and shower trays have very good functional and aesthetic features. Products made of mineral cast, which is a blend of natural stones, such as marble or granite, and resin, feature a perfectly smooth, non-porous surface with very high durability and resistance to discoloration. Antibacterial features of Gelcoat coating make it easier to keep the product clean and prevent the development of dangerous bacteria, which is often a big problem in the bathroom.

#### BESCO GLAM ILLUMECOAT

Besco Glam with IllumeCoat finish is a specially developed layer of colour applied to the bathtub or washbasin in the production finishing process.

IllumeCoat is available in three unique colours: gold, silver and graphite. Thanks to the specks that IllumeCoat contains, Besco Glam creates extremely delicate structure, which emphasizes the depth and brilliance of each colour.

#### SANITARY COMPOSITE

Products made of sanitary composite are finished with extremely resistant Gelcoat coating. Thanks to the use of the highest quality sanitary composites, Besco freestanding bathtubs have very good functional and aesthetic features. Products made of carefully selected sanitary composites are characterized by a perfectly smooth surface with very high durability and resistance to discoloration. Antibacterial features of the Gelcoat layer make it easier to keep the product clean and prevent the development of dangerous bacteria, which is often a big problem in the bathroom.

#### BESCO BESAFE

BeSafe coating is a specially developed anti-slip layer applied to the surface of a bathtub or shower tray. It provides maximum comfort and safety of bathing. The delicate structure of BeSafe guarantees hassle-free maintenance of the bathtub or shower tray in cleanness and positively influences the aesthetic features of the product.

#### BRASS

The material that is ideal for bathroom faucets is brass, as its properties guarantee the highest quality and durability of the alloy, especially in contact with water at extreme temperatures. Cast brass, in combination with components from the best European suppliers, ensure tightness and reliability of Besco bathroom faucets. Brass also meets all standards that apply to products in contact with drinking water.

# GLAM EFFECT

Nothing reflects the character of a glamorous interior more than a bit of an elegant glow! Besco Glam with IllumeCoat coating comes in three Unique shades of gold, silver and graphite.

Thanks to the specks that IllumeCoat contains, Besco Glam creates an extremely delicate structure, which emphasizes the depth and brilliance of each colour.

# BLACK & WHITE

The Besco Black & White collection includes many freestanding bathtub models with perfectly matching washbasins and bathroom faucets.

new

# M A T T

MATT FINISH

**NEW 2022**

A new reveal of products made in Mineral DuraBe technology, which are now also available in a matt finish. A specially developed production technology allows us to personalize a selected freestanding bathtubs or washbasins.

The bathroom requires extremely thoughtful solutions that combine functionality with timeless design. That is why our Mineral DuraBe Matt products have a gloss finish inside, which is perfect for everyday contact with water, with the outer part in matt finish that gives bathtubs and washbasins a unique character.

new

**DRAIN & OVERFLOW  
COVERS AVAILABLE  
IN 5 COLOURS:**

CHROME, GOLD, WHITE,  
MATT BLACK  
& GRAPHITE

We personalize each bathtub to make sure its aesthetics match the arranged bathroom interior, which is possible thanks to siphon and overflow covers available in various colours: chrome, matt black, white, gold and graphite. Now, it is the customer who decides which colour of the above-mentioned elements will be installed in the selected bathtub model, so that he can perfectly match it to the colour of other bathroom fittings.

## 15mm

Currently, there is a fast growing interest in acrylic bathtubs with a slim rim, that are ideal for a built-in or floor-level installation.

We have completed our offer to fulfil our Customers' needs by introducing slim rim versions of all bestselling models of our bathtubs, as well as the Vitae Slim and Avita Slim models in the „+“ version, with siphon in chrome or gold with Slim rectangular overflow included in the set.

Bathtubs with the SLIMEffect finish will fit perfectly into interior designed in any style.

The ultra-low, slim rim allows a built-in installation with tiles covering, as well as floor-level mounting. The selection of other elements of the bathroom equipment will determine its style and character. Create your perfect interior by choosing a slim bathtub model in combination with a matching washbasin and faucets.

# WASHBASINS

**Freestanding or counter-top? With a faucet mounted directly on a counter-top or dedicated to be mounted on a basin shelf?**

Regardless of which model from the offer you choose, thanks to the Mineral DuraBe production technology, you will create your perfect washbasin. Any colour from the RAL palette, with a full-colour finish, or in a two-coloured option? Or maybe glamour? Chrome, gold, matt black or graphite siphons & faucets will complete the selected model.

## OVERHEAD SHOWER HEADS

All shower sets from Besco faucets series have a 20x20 cm and 20 cm diameter overhead shower head as standard. Complementing the range, we have decided to introduce an alternative for those who prefer a larger overhead shower head, available in 30x30 cm or with a diameter of 30 cm. The availability of the square and round model, in a full range of colours, i.e. chrome, gold, black and graphite, will allow easy replacement of this element in any Besco shower set.

# YOUR BATHROOM

## DATABASE OF 3D MODELS

The right design makes the basis of any stylish interior. Especially such an important room, like the bathroom or a bathing salon is! The choice of the optimal product, both in terms of design and aesthetics as well as dimensions, is very important, most often it determines the appearance and comfort of using the bathroom by its users.

We have provided a database of 3D models for the CAD Decor Program, which covers all popular Besco products, ie bathtubs, freestanding bathtubs, washbasins, shower enclosures and shower trays, shower doors, bath screens and a range of accessories to assist interior designers & architects in their work. All 3D models are also available in the dwg extension on the besco.eu website.

We strive to make our products available to all customers, both those working, who are choosing their bathroom products online, by taking care of our website [www.besco.eu](http://www.besco.eu), as well as for those who choose everything for the bathroom in standard showrooms across Poland. We are constantly expanding the network of our trading partners as well as the Besco studios with expositions of our most popular products all over Poland.

At the same time, we also care for those customers who choose to work directly with a designer, who transforms a vision into a project, by creating unique bathroom interiors. This cooperation is possible thanks to the availability of 3D models of our products, which we gradually supplement with the introduction of new models to the market.
